

**REMARKS**

This paper is responsive to the Restriction requirement dated January 9, 2007. Applicants elect, without traverse, the claims of Group I. Applicants also elect, with traverse, basic substitutions at position 13 as the species for examination (N13B). Applicants respectfully request that the Examiner also search acidic substitutions at position N13 (N13Z), as these substitutions will be uncovered by a search and analysis of mutations position 13 and therefore do not present an additional burden to the Examiner. As Applicants understand, consideration of additional species will be provided upon allowance of a generic claim.
